

DO I NEED THIS SOFTWARE?

You need this application if you want to:

- Distribute receipt entry responsibilities between employees
- Identify who entered each receipt
- Minimize wait times for your customers
- Import payments from bank files

WHAT WILL THIS APPLICATION DO FOR ME?

Our Multi-Cashier extension allows multiple users to process receipts. Each cashier will have their own User ID. Additionally, this extension comes with Import Payment functionality, which will allow you to import payments from a bank file to auto-generate receipts for those records.

WHAT CAN I LOOK FORWARD TO WHEN USING THIS PROGRAM?

Augmented Office Efficiency:

- You will expedite receipt entry when multiple employees can enter receipts
- You will minimize wait times for your customers when all employees in your office can process payments and issue receipts

Employee Accountability:

- You can easily monitor who entered which receipt by setting up User IDs and using the Identify Cashier function

- You will hold your employees and colleagues responsible for the accuracy of their own receipt entries and batches

Multiple Batches:

- You will gain the ability to create batches for each receipt type, allowing for quick entry and information retrieval
- You will simplify the processing of special payment types (such as Installment Payments) with the ability to add each type to their own batch

Import Payment Functionality

- You can import payments from a bank file and automatically generate receipts for those payment records
- **Compatible File Formats include:**
ATB CVS Format, BMO Import Format, CIBC Import Format, CUPS Standard 9 Format, Central1 AFT Format, Central1 EDI Format, RBC EDI Format, Scotiabank EDI Format, TD 200 Byte Format, Telpay CSV Format, Telpay EDI Format
