SECURITY SYSTEM - PREMIUM

MuniSoft
Municipal Software... and More!

Product Information

DO I NEED THIS SOFTWARE?

You need this application if you want to:

- Provide an increased level of front-line security for your municipal data
- Precisely grant and disallow access to various MuniSoft modules and functions for each staff member
- Enforce strict password policies

WHAT WILL THIS APPLICATION DO FOR ME?

Security Premium goes beyond the baseline security the Standard System provides. Using Premium, you can set up specific user permissions for every staff and council member who needs to access your MuniSoft system.

WHAT CAN I LOOK FORWARD TO WHEN USING THIS PROGRAM?

An Increased Level of Protection:

- You will prevent unauthorized individuals from accessing your municipal data; only individuals with User IDs, passwords, and the appropriate permissions can access MuniSoft programs
- You can enforce password complexity rules, so that all users must use passwords that meet the required criteria (at least six characters, one alphabet and one numeric character, etc.)

- You will know exactly which user did what with the system's ability to track transactions based on the logged-on user

Set Specific User Groups and Permissions:

- You will have full control as the security administrator; only one person can decide who has access to what
- You will have a larger number of pre-set User Groups and can also add new and change existing User Groups to meet the distinct needs of your office

- You can create unique combinations of User Permissions; when a user is added to a User Group, they automatically acquire the permissions associated with the Group; however, you can override those permissions for specific users as necessary
- You can grant and deny permissions, not only for accessing a program, but also whether or not a specific user can perform certain functions within the program(s)

You must have Security Standard installed to use Security Premium. Security Premium is an extension of Security Standard. To place an order, please visit our [Software Order Desk](#) on our website or email clientcare@munisoft.ca.
