

PubWorks – GIS Interface

PubWorks GIS Interface allows you to graphically represent the cost of infrastructure maintenance and service on a map with the information that is most appropriate to you and your organization. This method of information representation can be very effective when attempting to communicate your operation's performance to elected officials, governmental managers and the public.

Features and Benefits

- ❑ Easy-to-use software minimizes learning curve and errors
- ❑ Multi-use design provides for added productivity
- ❑ Seamlessly integrated with the PubWorks Asset and Work Management Core
- ❑ Dynamically expose road maintenance cost data directly in ESRI's ArcGIS via the PubWorks toolbar
- ❑ Select and query on road assets using native ArcMap tools and techniques
- ❑ Unlimited mapping capabilities for graphical cost analysis
- ❑ Create, name and save queries for future reuse
