

DO I NEED THIS SOFTWARE?

You need this application if you want to:

- Simplify the budgeting process
- Reduce the need for budget spreadsheets
- Easily create different budget scenarios for comparisons
- Save precious time and minimize manual effort

WHAT WILL THIS APPLICATION DO FOR ME?

MuniSoft's Budget Extension allows you to create up to five different budget scenarios by extracting information from the General Ledger. With these scenarios, you can change values without affecting your data and develop potential budgets alongside the operating accounts.

WHAT CAN I LOOK FORWARD TO WHEN USING THIS PROGRAM?

A Formalized Budget Process:

- You will value the ability to work on a new budget without affecting your usual reports
- You will strengthen your budgetary decision making by creating up to five different budget scenarios and comparing them
- You will present your council with custom budget reports — that match your financial statements — for immediate evaluation and/or approval

- You will create effective budget reporting tools by converting existing custom reports

Saving Time and Effort:

- You will minimize the amount of manual labour involved in budget creation
- You will choose from options — such as last year actual, last year budget, blank budget amount and more — and the system will automatically generate a starting budget based on it

- You will appreciate that as transactions and adjustments are processed, balances and figures will update automatically and accurately
- You will use the Approve Budget button to automatically update the GL Accounts with the new approved budget amount
