

DO I NEED THIS SOFTWARE?

You need this application if you want to:

- Easily monitor your vehicles and equipment
- Save precious time and expedite data entry
- Competently manage your parts inventory
- Increase the life of your assets and save costs

WHAT WILL THIS APPLICATION DO FOR ME?

PubWorks Fleet Manager allows you to oversee equipment repairs and upkeep with ease. You can implement custom maintenance schedules for all of your equipment and track work order information, such labour and parts costs.

WHAT CAN I LOOK FORWARD TO WHEN USING THIS PROGRAM?

Saving Time, Effort, & Costs

- You will minimize major repair costs by creating preventative maintenance schedules for each of your vehicles and equipment
- You will save mental effort by creating Fleet Work Orders — assigning workers to service your equipment — since your system will calculate all costs
- You will record odometer readings to better track equipment use, maintenance scheduling and fuel consumption

Proficient Inventory Management:

- You will appreciate your system's automatic update of stock levels and unit prices as work orders are entered
- You will receive re-order reports and reminders from your system when stock levels grow low
- You will increase the efficiency of equipment servicing by recording equipment specifications, such as fuel, tire, and battery type and more

Valuable Features

- You will use re-usable Part Kits — an assembly of inventory parts that can be used as a unit — and Service Groups — an assembly of shop tasks and inventory parts that can be used as a unit — to expedite and improve the accuracy of data entry for repairs
- You will automatically find the information you need to analyze costs and make replacement decisions through the many reports available in the system
