

DO I NEED THIS SOFTWARE?

You need this application if you want to:

- Enhance department efficiency and employee productivity
- Schedule inspections, upkeep and replacements with ease
- Minimize expensive demand maintenance
- Increase the life of your assets and save costs

WHAT WILL THIS APPLICATION DO FOR ME?

The PubWorks Work Order module allows you to create planned maintenance schedules to ensure your assets are inspected and worked on regularly. Each work order contains a list of tasks and a location and can be set to occur as often as you like.

WHAT CAN I LOOK FORWARD TO WHEN USING THIS PROGRAM?

Proficient Management

- You will boost department organization by shifting from a demand maintenance program to a planned maintenance program
- You will identify trends by analyzing history records — allowing you to adjust work schedules accordingly — to optimize labour and resources
- You will increase employee productivity by scheduling them to the same recurring work orders and more

- You will impress your citizens and council with your proactive management methods

Saving Time, Effort and Costs

- You will minimize major repair costs by establishing maintenance plans for each of your assets
- You will appreciate the To-Do-List functionality designed to compile all tasks due for the displayed time period, without any manual effort
- You will receive reminders for work in need of completion

Accurate Information for Smart Decisions:

- You will automatically find the information you need to track costs, monitor work progress and oversee budget plans through the many reports available in the system
- You will enjoy the program's ability to automatically perform resource tracking and job costing
